Is the scaled-up RAW case better (lower net impact)?

**scaled up vs. prototype - today**

| | biopol | knit | timber | cfw |
|---|---|---|---|---|
| climate change | yes | yes | no | no |
| ozone depletion | yes | yes | no | no |
| particulate matter formation | yes | yes | no | no |
| acidification | yes | yes | no | no |
| freshwater eutrophication | yes | yes | no | no |
| land use | yes | yes | no | yes |
| water use | yes | yes | no | no |
| mineral resources | yes | yes | no | no |

**scaled up vs. prototype - 2050**

| | biopol | knit | timber | cfw |
|---|---|---|---|---|
| climate change | yes | yes | no | yes |
| ozone depletion | yes | yes | no | no |
| particulate matter formation | yes | yes | no | no |
| acidification | yes | yes | no | no |
| freshwater eutrophication | yes | yes | yes | yes |
| land use | yes | yes | no | yes |
| water use | yes | yes | no | no |
| mineral resources | yes | yes | no | no |

**scaled up vs. conventional bio-based - today**

| | biopol | knit | timber | cfw |
|---|---|---|---|---|
| climate change | no | yes | yes | yes |
| ozone depletion | no | yes | no | yes |
| particulate matter formation | no | yes | yes | yes |
| acidification | no | yes | yes | yes |
| freshwater eutrophication | no | yes | no | yes |
| land use | no | yes | yes | yes |
| water use | no | yes | yes | yes |
| mineral resources | no | yes | no | yes |

**scaled up vs. conventional bio-based - 2050**

| | biopol | knit | timber | cfw |
|---|---|---|---|---|
| climate change | no | yes | yes | yes |
| ozone depletion | no | yes | yes | yes |
| particulate matter formation | no | yes | yes | yes |
| acidification | no | yes | yes | yes |
| freshwater eutrophication | no | yes | yes | yes |
| land use | no | yes | yes | yes |
| water use | no | yes | yes | yes |
| mineral resources | no | yes | yes | yes |

**scaled up vs. conventional fossil-based - today**

| | biopol | knit | timber | cfw |
|---|---|---|---|---|
| climate change | no | yes | yes | no |
| ozone depletion | no | yes | yes | no |
| particulate matter formation | no | yes | yes | no |
| acidification | no | no | yes | no |
| freshwater eutrophication | no | yes | yes | no |
| land use | no | no | yes | no |
| water use | no | yes | yes | no |
| mineral resources | no | yes | yes | yes |

**scaled up vs. conventional fossil-based - 2050**

| | biopol | knit | timber | cfw |
|---|---|---|---|---|
| climate change | no | yes | yes | no |
| ozone depletion | no | yes | yes | no |
| particulate matter formation | no | no | yes | no |
| acidification | no | no | yes | no |
| freshwater eutrophication | no | no | yes | no |
| land use | no | no | yes | no |
| water use | no | yes | yes | no |
| mineral resources | no | yes | yes | yes |
